XtremeMac Deluxe iPod Case

The most versatile, beautiful and protective case made for your Dock Connector iPod. Unique design exposes the entire face of your iPod when opened, securely framing Apple's design. Exclusive reversing cover design locks the cover behind the case when you want unlimited access to the iPod. Encase your iPod with the ultimate in luxurious style and protection. Features an XtraSecure Belt Clip.

XtremeMac uses only the finest, hand selected fabric and leather, dyed to exacting color specifications, then lined, padded and hand fitted to product an elegantly stylish, yet sensually luxurious case for your iPod.

This is only iPod case that does not cover the face of the iPod with some material when opened. Our exclusive, patent pending design uses a strong spring steel frame wrapped in leather to frame the face of the iPod, holding it securely without anything touching the face of the iPod when opened.

The fit has been tweaked to perfection, allowing for the varying thicknesses of 10 thru 40GB iPods to be handled perfectly.

Another critical element of the design is the lining and the interior of the case. After lengthy tests, we selected a durable lint-free material, and made sure that there were no exposed labels or stitching that could cause scratching over time.

The XtraSecure Belt Clip

An iPod falling from your hip could be a disaster. The Deluxe iPod case combines a built-in mounting post on the case with the world's most secure swivel belt-clip. The clip itself is made of high-strength T-85 resin and uses a spring steel closure mechanism, and a host of design features that eliminate typical belt-clip maladies—breakage, slippage, and accidental pop-outs.
